

CAUTION

In making the adjustment of the paper feed use special care to see that the stop nuts are set correctly. If the movement of the rod is checked by the pawls instead of the stop nuts, the paper feed wheel ratchets will quickly work loose. Be sure that all washers and split pins are in place; if these are forgotten, their studs will soon work loose and the holes in which the studs work will quickly wear elongated.

*First*  
OBJECT

To ensure that the ratchet pawl a6KC1 shall draw down far enough to feed the paper at each stroke; also to ensure that
